**20TH ANNUAL
CONFERENCE
SOCIETY FOR
INSTITUTIONAL &
ORGANIZATIONAL
ECONOMICS**

June 15-17th 2016
Paris

Dear Fellow SIOE Members:

Welcome to Sciences Po and the 20th Annual Meeting of the Society for Institutional and Organizational Economics (known as the International Society for New Institutional Economics until last year). It is reassuring that the change of the Society's name did not break our annual conference's tradition to attract high quality papers from an international community of scholars in many disciplines including economics, political science, sociology, management, history, and law. I would like to thank my fellow members of the Program Committee who have worked hard to select 251 papers that will be presented in 76 parallel sessions.

We are happy and excited to have Philippe Aghion and Alberto Alesina to deliver keynote talks on their recent research in the interaction of social mobility, inequality, redistribution and political and economic institutions. Both Philippe and Alberto have made seminal contributions to institutional and organizational economics and continue producing groundbreaking research that is relevant for all SIOE members.

I would like to thank Sciences Po's Department of Economics and the Laboratory for the Interdisciplinary Evaluation of Public Policy (LIEPP) at Sciences Po for financial and organizational support for our conference.

I am looking forward to seeing you in SIOE 2016!

Sergei Guriev

Keynote Speakers

Philippe Aghion is a Professor at the College de France and at the London School of Economics, and a fellow of the Econometric Society and of the American Academy of Arts and Sciences. His research focuses on the economics of growth. With Peter Howitt, he pioneered the so-called Schumpeterian Growth paradigm which was subsequently used to analyze the design of growth policies and the role of the state in the growth process. Much of this work is summarized in their joint book *Endogenous Growth Theory* (MIT Press, 1998) and *The Economics of Growth* (MIT Press, 2009), in his book with Rachel Griffith on *Competition and Growth* (MIT Press, 2006), and in his survey “What Do We Learn from Schumpeterian Growth Theory” (joint with U. Akcigit and P. Howitt). In 2001, Philippe Aghion received the Yrjo Jahnsson Award of the best European economist under age 45, and in 2009 he received the John Von Neumann Award.

Alberto Alesina is the Nathaniel Ropes Professor of Political Economy at Harvard University. He obtained his Ph.D. from Harvard in 1986. He served as Chairman of the Department of Economics from 2003 - 2006. He is a member of the National Bureau of Economic Research and the Center for Economic Policy Research. He is a member of the Econometric Society and of the American Academy of Arts and Sciences. He is the director of the political economy program of the NBER since 2006.

He has published extensively in all major academic journals in economics. He has published five books. Amongst those are: *The Future of Europe: Reform or Decline*, published by MIT Press, with Francesco Giavazzi and *Fighting Poverty in the US and Europe: A World of Difference*, published by Oxford University Press, with Edward Glaeser. He has been a Co-editor of the *Quarterly Journal of Economics* for six years and Associate Editor of many academic journals. He has published columns in many leading newspapers around the world and has visited several institutions including MIT, Tel Aviv University, University of Stockholm, The World Bank, and the IMF. He holds a visiting position with IGIER Bocconi.

His work has covered a variety of topics: political business cycles, the political economy of fiscal policy and budget deficits, the process of European integration, stabilization policies in high inflation countries, the determination of the size of countries, currency unions, the political economic determinants of redistributive policies, differences in the welfare state in the US and Europe and, more generally, differences in the economic system in the US and Europe, the effect of alternative electoral systems on economic policies, and the determination of the choice of different electoral systems, culture and economics, ethnic conflict, inequality and redistributive policies, and the macroeconomic effects of fiscal policy.
